ONYX

The Onyx finish is achieved by applying a black stain over our standard Sienna finish. It is then lightly hand sanded to reveal the Sienna finish underneath giving it the burnished look. Each cabinet is unique in appearance. The Onyx finish is available in both Marsh Cabinets and High Point Cabinetry lines in the maple and cherry woods only. Please consult your catalog for availability.

GLAZE FINISHES

Glazed finishes are produced by applying a contrasting glaze finish coat over our standard finish. The glaze is then removed by hand wiping. This process leaves the contrasting glaze in the grooves and corners. A clear sealer is then applied. Each cabinet will have a subtle hand finished appearance. Our craftsmen take pride in the detail and quality of their glazed cabinets giving each a unique appearance. Doors shown are maple Florence and used as a glaze representation only. Glazes are available in both Marsh Cabinets and High Point Cabinetry lines in the maple and cherry woods only. Please consult your catalog for availability.

NOTE: Finishes shown are reproduced as accurately as state of the art printing permits.
