Window & Door Trim

Adding Fypon® window and door trim takes the look of a home from ordinary to extraordinary. Many pieces are designed to work together, and some can even be ordered moulded as one piece to further speed installation. From pilasters, pediments and crossheads, to arches and panels, our architectural options easily enhance a home's design. For installation and finishing instructions, please visit www.fypon.com.

How to Use This Section

The products in this section of the catalog are organized by size, from smallest to largest. Where applicable, part numbers are shown for fabricated products with attached accessories, and matching unattached accessories are referenced or shown with the product.

How to Order

Window Trim

To order window trim, first measure the window unit to be trimmed. Next choose the desired products and accessories to complete the look.

Door Trim & Entrance Systems

When ordering door trim, first measure the door unit to be trimmed. The unit can be measured with or without brick mould; however, the brick mould is essential when using a storm door. Next choose the desired pilaster style and size. Finally, choose a pediment or crosshead that is wide enough to span the opening plus the brick mould and pilasters (see example). Add desired accessories to complete the look.

Door Surround Kits

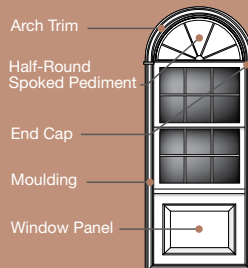

Specifying a Door Surround Kit is straightforward: Simply answer a few basic questions, such as single door, single door with one sidelite, single door with two sidelites or double door. Pilasters and crossheads come in a variety of styles and sizes to fit any door. The pilaster can be purchased in a plain or fluted design. Coordinating crossheads for the top of the door frame are available with or without a keystone.

Window & Door Trim Accessories

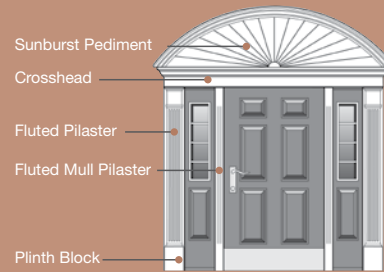

Keystones, dentil trim, trim strip and bottom trim accessories are available attached to standard products as fabricated products. Keystones can also be ordered as unattached accessories by listing the line item on your order.
